DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 5-14, 20, 21, 23-31, 36-38, 40-48, 54, 55, 57-64, 100-103, 106, 108, 110-115, 119 and 120, drawn to methods and circuits for encoding an audio signal, classified in class 381, subclass 23.
- II. Claims 15-19, 32-34, 49-53, 65-68, 107, and 109, drawn to methods and circuits for decoding an encoded audio signal, classified in class 381, subclass 22.
- III. Claims 86-99, 104, 105, 116-118, and 121, drawn to an encoded digital audio medium, classified in class 386, subclass 105.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as storing equalization information corresponding to multi-channel signals. Invention II has separate utility such as customized reproduction of stored audio on digital audio media. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: Species I – Figure 1 which is directed to spectral mapping coefficients and correspond to claims 1-3, 5-9, 15-17, 20, 21, 23-26, 32, 33, 36-44, 49-51, 54, 55, 57-60, 65-

Art Unit: 2644

68, 86-89, 93-96, and 100-121; Species II – Figure 7 which is directed to vector mapping coefficients and correspond to claims 10-14, 18, 19, 27-31, 34, 45-48, 52, 53, 61-64, 90-92 and 97-99.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2644

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
